

Patient Centered Medical Home

“Welcome to Your Medical Home”

Patient-Centered is a way of saying that you, the patient, are the most important person in the health care system. You are the center of your healthcare.

A **Medical Home** is an approach that yields both better health care and lower costs. With your medical home, you are joining a team that provides centralized, comprehensive, coordinated primary care and cultivates partnerships between patients, their personal physicians, the care giving team, and the patient’s family.

“You and your health care are at the center of your medical home team”
